Personal

Born on August 03, 1977

Russian Citizen

Spoken languages: English and Russian

Education

Ph.D. Physics, University of Exeter, United Kingdom, 2009.

M.Sc. Technical Physics, St. Petersburg State Polytechnical University, Russia 2001.

B.Sc. Physics, St. Petersburg State Polytechnical University, Russia 1999.

Employment

University of Basel, Switzerland 2014–present (Post-doc Researcher)

National University of Singapore, Singapore 2013–2014 (Research Fellow)

Weizmann Institute of Science, Israel 2009–2013. (Post-doc Researcher)

University of Exeter, United Kingdom 2005–2009. (Ph.D. Student)

Epi-center Ltd., St.Petersburg, Russia 2004–2005. (Engineer)

Friedrich-Alexander Universität Erlangen-Nürnberg, Germany 2002–2004. (Guest Researcher)

Ioffe Physico-Technical Institute, St.Petersburg, Russia 1998–2001. (Junior Researcher)

Professional skills

Equipment developed/manufactured

Developed and manufactured a scanning nanoSQUID microscope working at ^4He temperatures and a low-temperature nanowire-based atomic force microscope, UHV e-gun evaporation system, two LHe-cooled thermal evaporation systems, 3-axis positioner for ^4He optical cryostat, etc.

Equipment used

Low temperature scanning probe microscopes, scanning SQUID microscope, nano-fabrication (e-beam and photolithography), evaporators (thermal and e-gun, including UHV and cryo-cooled evaporators), magnetron sputtering and plasma assisted deposition systems, Ar-ion, DC and RF plasma and RIE etching machines, bonding machines, x-ray diffractometers (double crystal and powder diffraction), lasers (CO₂, Ar-ion, Ti:Sapph, CO₂ pumped THz laser). ³He and ⁴He optical and non-optical cryostats with magnets, dry dilution refrigerators.

Equipment serviced

Scanning probe microscopes, evaporators, sputtering machines, lasers, ³He cryostats, x-ray diffractometers.

Software development

Extensive LabView skills, automated several scanning probe microscopes, evaporators and diffractometers, programmed 6 data acquisition systems for scanning probe microscopy, transport and optical measurements working in magnetic fields since 2002 and all these systems are still in use. Data processing in Matlab.

CAD Engineering

Solid Works, AutoDesk AutoCAD and Inventor Professional.

Supervision and teaching

Physics problems class and laboratory demonstrations in University of Exeter.

Development and supervision of various projects for summer and rotational students in Weizmann Institute of Science.

Publications

2015, Detection of anomalous Hall voltages in ultra-high mobility two-dimensional hole gases generated by optical spin orientation.

D. Vasyukov, A. Plaut, M. Henini, L. Pfeiffer, K.W. West, C.A. Nicoll, I. Farrer, D.A. Ritchie, *Phys. Rev. B* **91**, 201406(R)

2013, A scanning superconducting quantum interference device with single electron spin sensitivity. D. Vasyukov, Y. Anahory, L. Ne'eman, A. Finkler, Y. Segev, Y. Myasoedov, M. L. Rappaport, M. E. Huber and E. Zeldov, *Nature Nanotechnology* **8**, 639; doi:10.1038/nnano.2013.169.

2012, Scanning superconducting quantum interference device on a tip for magnetic imaging of nanoscale phenomena. A. Finkler, D. Vasyukov, Y. Segev, L. Ne'eman, E. O. Lachman, M. L. Rappaport, Y. Myasoedov, E. Zeldov and M. E. Huber, *Rev. Sci. Instrum.* **83**, 073702.

2012, Nano-sized SQUID-on-tip for scanning probe microscopy. A. Finkler, D. Vasyukov, Y. Segev, L. Ne'eman, Y. Anahory, Y. Myasoedov, M. L. Rappaport, M. E. Huber, J. Martin, A. Yacoby and E. Zeldov, *Journal of Physics: Conference Series* **400**, 052004.

- 2010, Self-aligned nanoSQUID on a tip. A. Finkler, Y. Segev, Y. Myasoedov, M. L. Rappaport, L. Ne'eman, D. Vasyukov, E. Zeldov, M. E. Huber, J. Martin and A. Yacoby, *Nano Letters* **10**, 1046.
- 2010, Measurement of a large hole g-factor in two-dimensional hole gases. D. A. Vasyukov, A. S. Plaut, M. Henini, *Physica E* **42**, 964.
